

January 29, 2010

To: Mayor Fawcett and members of Council:

There follows a question for the upcoming meeting of Council:

Under the PSAB process, Council has indicated that the cost to replace roads with a 0 to 5 year life expectancy is \$26 million, and that the Township is expected to build something into the budget each year for this purpose. Does this mean that Council will have to allocate \$5.2 million during each of the next five years to fund the replacement of those roads?

Sincerely,

Michael Daniher

Denise Holmes  
CAO  
Melancthon Township:

Denise:

Could Council please consider this question at its next meeting?

Would Council please indicate when its meeting with 401 Energy will be held, whether the content of that meeting will be made public, and whether Council now knows the location and local participants in the proposed 3,500 acre wind farm project?

Bruce Wilson

Dear Mayor Fawcett and members of Council:

I submit the following written question for the next Public Question Period:

In addition to such items as reduced grants, OMB reserves proposed by Mr. Rowe and provisions under PSAB, could Council please indicate whether there are any other new issues or significant changes from last year that will have to be reflected in the 2010 Budget?

Sincerely,

John Lowndes
